

ATALIS NOTAM Management

A powerful Aeronautical Information Management system looking towards the future

ATALIS NOTAM Management offers all the relevant functions required by an International NOTAM Office (INO) to provide increased reliability and quality of Aeronautical Information, in full compliance with ICAO and EUROCONTROL SARPS. Integrated with ATALIS AIXM Aeronautical database, ATALIS NOTAM Management paves the way towards the future digital NOTAM standard.

ATALIS NOTAM Management implements an International NOTAM database and automated processing. All the necessary but fastidious work like checklist preparation, replies, NOTAM repetition, multipart concatenation is automatically handled by the system.

Proper message syntax and semantics insuring system interoperability is no more a burden task.

Highlights

- User-friendly graphical HMI enabling an easy learning and a safe use of the system
- NOTAM history to track operator's actions
- NOTAM protocol compatible with ICAO and EUROCONTROL SARPS
- Powerful integration with ATALIS AIXM Aeronautical database
- Textual and graphical Web interface
- Hot/Standby architecture for h24/24 disponibility
- Safety analysis compliant with SWAL4
