

ATALIS Publication Management

Increase the efficiency of the publication of your Aeronautical Information

ATALIS Publication Management is the natural extension to ATALIS AIXM database for aeronautical data publication.

ATALIS Publication Management provides all facilities for ICAO publication, dynamically linked to AIXM database.

Such integration prevents discrepancies and inconsistencies in AIP production, as well as an efficient and powerful workflow.

Highlights

- Based on world leader ©MS Word 2007
- Complete usage of AIXM database for AIP/eAIP consistency
- Produce all kind of ICAO publication with great level of automation
- Handle multiple AIP publications (eg civil/military) on single database
- Bilingual AIP
- Not limited to AIP publication, but opened for any internal publication or reports
- eAIP production fully consistent with AIP processing
